

Cihan TAMYILDIRIM

Frontend Developer

İzmir / Türkiye

I am an experienced front-end developer. In recent years, I realized that I love the software field, which I have loved since my university period and I have made this my profession. In this career journey, I want to work in a company that will support my development and contribute to its employees with a professional and corporate culture.

Experiences

- Frontend Developer
HSP Software
04.2022 - 08.2022

I made Javascript CSS and HTML coding of a project that creates No-Code e-commerce and corporate website.

- Web Developer
ERPTOREN
05.2022 - ----

I do corporate website consultancy with web design and simple coding.

Tools I've Experienced

- Javascript / Typescript / Node.js
- React.js / Angular / JQuery
- CSS3 - BOOTSTRAP - TAILWIND
- SASS - SCSS
- MongoDB
- API Services

Frontend Developer

Some of my Projects

A study that lists restaurants by location, taken from the API that I have done with Angular. There is also a version of the same work done with JQuery.

<https://ephemeral-cascaroon-36b4a5.netlify.app>

A TODO application that can add, remove, complete and edit using the state management method I made by deploying React.js useReducer with Context

<https://mellifluous-salamander-9f3b9e.netlify.app>

Application that can be searched by country, uploading Corona Virus information by country by pulling data from API with React.js

<https://dynamic-kangaroo-b73103.netlify.app>

The website that come from as a template designed at ADOBE XD. I coded this project by using JQUERY

<https://stellular-queijadas-b2c17c.netlify.app>

A blackjack game with React.js. I've used Context Reducer and Effect hooks and some libraries like CLSX and React-icons. For style I've used mostly Tailwind and sometimes pure CSS.
